## *Surging Traffic Is Slowing Down Our Internet*

With people going online more in the pandemic, internet traffic has exploded. That's taking a toll on our download speeds and video quality.

- an underlying explanation, reason, etc., that is not apparent

# A cognitive systems view of working in complex systems

# A cognitive systems view of working in complex systems

*“Woods' Theorem:  
As the complexity of a system increases, the  
accuracy of any single agent's own model of  
that system decreases rapidly.”*

*-Stella report  
([stella.io](https://stella.io))*

# The coordination paradox

In complex adaptive systems, everyone's model is going to be partial and incomplete (Woods, 2017).

# The coordination paradox

In complex adaptive systems, everyone's model is going to be partial and incomplete (Woods 2017).

Therefore we need multiple, diverse perspectives to handle non-routine or exceptional events (Grayson, 2018, Watts-Perotti & Woods, 2001).

# The coordination paradox

In complex adaptive systems, everyone's model is going to be partial and incomplete (Woods 2017).

Therefore we need multiple, diverse perspectives to handle non-routine or exceptional events (Grayson, 2018, Watts-Perotti & Woods, 2001).

But there is additional cognitive load working with others (Klein et al, 2005; Maguire, 2019).

**Cognitive costs of coordination – additional mental effort, load and delay required to participate in joint activity.**
