Sun Comes Through for USENIX

by Jane-Ellen Long, Managing Editor, *;login:*

Thanks to the help of Hal Stern, Distinguished Engineer at SUN Microsystems, USENIX has received a donation of two Enterprise 250s, with dual 400MHz UltraSPARC II processors with 2MB cache, 8 256MB memory expansions for each, 2 internal 18.2GB 10,000 RPM drives, 19" color monitors, and Solaris 7 OS.

This equipment will enable USENIX to replace its aging servers and generally improve performance both internally and externally.

Thank you, Sun Microsystems!
